

Patch Panel

Economic 1U | SC Duplex | Empty | Black
12 ports

LightMax[®] 1U Economic Distribution Patch Panel offers a excellent solution for fibre optics termination and interconnection. It is made of cold rolled steel finished on a RAL 9005 black powder coating. Easy access to its interior when it comes to organize and identify the fibres and optical splices. The front panel has 12 cut-outs for SC duplex (or LC quadruplex) adapters. It is delivered with all the necessary accessories for fibre identification and organization and splices protection.

Features:

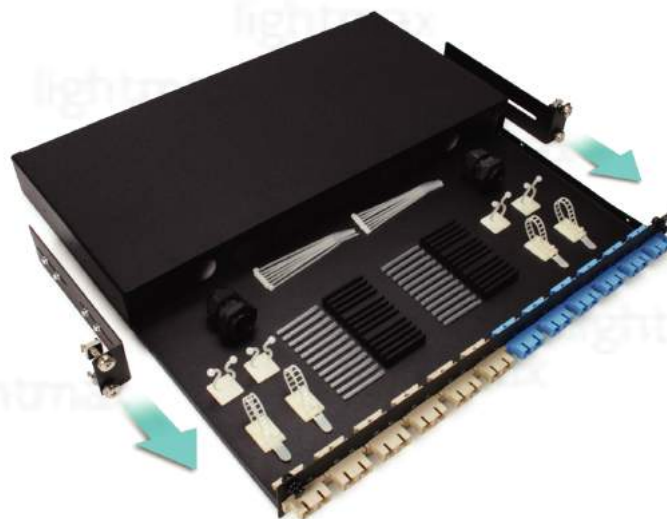

- Adjustable side flaps for 19"U racks or cabinets
- Front and lateral protection.
- Moving tray for easy access and fibre maintenance
- Two protection sleeves holders
- Box and tray made of cold rolled steel
- RAL 9005 black baked powder coating
- All installation accessories included
- EIA-310-E compliance

Application:

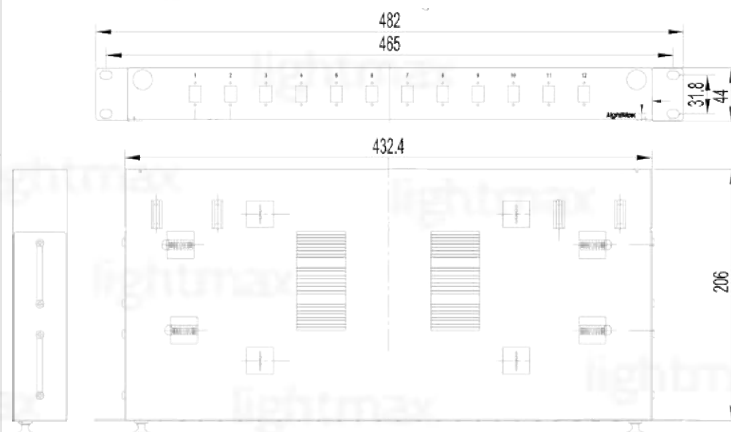

- Optimized for LAN environments
- Cable and patchcords/pigtails management
- High fibre capacity and deployment

Installation:

- In racks and cabinets
